Abstract

The Propulsion Research Center at the University of Alabama in Huntsville (UAH) came into being on February 1, 1991. This paper chronicles the growth of the Center, its contribution to the propulsion community and its impact on propulsion education at

- B. Goals:** The goals of the Center are captured in the Mission Statement that has provided the guiding principles since its inception in 1991.

Educate Students in the research process

Educate Stude

Serve as a prime propulsion engineering resource for Alabama, the southeastern U.S. and as a leading resource for the nation.

Over the first 13 years of operation, the faculty and students of the Propulsion Research Center have uncovered new ideas
